

HEART FLOWERS VALENTINE'S CARD

Here is everything you need to create an adorable heart flowers card!

Take the sheet of A4 paper and fold it in half.

WHAT YOU NEED

Make someone's heart blossom with this Valentine's Day Card!

- Kores White Glue
- Kores Glue Stick
- Kores Scissors
- Kores K-Marker Permanent
- Kores K-Liner
- Kores Korellos felt tip pens
- Coloured carton paper
- White card stock paper
- Thin ribbon

With a green Kores K-Liner felt tip pen draw as many flower stems as you wish (they should meet in the middle).

Cut some hearts of different colours, shapes and sizes from the coloured paper.

Personalize your hearts using Kores K-Liners, Korellos felt tip pens and Permanent K-Markers. You can add doodles or even write special messages!

Apply thin layer of Kores Glue Stick in the middle of each heart (on the back side).

Attach each heart to the card. Let the hearts overlap and create a 3D effect. Continue filling in the top of the card with hearts for a full heart bouquet.

Tie a small piece of ribbon into a bow.

Apply a drop of Kores White Glue to the bow and attach it in the middle of the drawn stems. Press for 30 seconds and let it dry.

Your lovely bouquet of hearts card is ready! Show your friends and family that you care. Kores Tip: you do not have to wait for the Valentine's Day to give it to someone special!!
